# Litter Box

## *Tips for Training*

### Setting up your litter box

We like plastic storage boxes for litter boxes. Inexpensive and large enough for them to use. Use a paper based filler to absorb droppings. Avoid wood shavings or kitty litter as this is poisonous.

### Beginning Stages

When there is an accident clean up the mess and place droppings in litter box. Clean soiled area well to remove smell.

### Repeat. Repeat. Repeat.

Our bunnies should come with a general knowledge of a litter box as our moms are litter box trained but most need a refresher in a new environment,.
